

Job Cost

Those who track costs for jobs or projects understand the headaches caused by the setup and data entry requirements. Simplify the process by utilizing the Job Cost (JC) add-on from *Alternative Business Systems, LLC*. The JC add-on works great for any organization that has employees at job sites or simply wants to track internal projects. We realize you want to track costs and billings in easy and efficient manner. JC is easy to use and configure because it utilizes the existing standards and functionality of TRAVERSE. Simply create the job and define your reporting requirements to get started.

Your TRAVERSE system gives your organization a vast competitive advantage: efficiency, accuracy and cost savings. Job Cost also offers advanced reporting and variance analysis tools to assist you with managing your projects. Job Cost also fully integrates with the TRAVERSE modules to eliminate duplicate entry.

Contact your local TRAVERSE Value Added Reseller for more information.
